Scholar Rock to Host Investor Day on May 22, 2024

May 14, 2024

CAMBRIDGE, Mass.--(BUSINESS WIRE)--May 14, 2024-- Scholar Rock (NASDAQ: SRRK), a late-stage biopharmaceutical company focused on advancing innovative treatments for spinal muscular atrophy (SMA), cardiometabolic disorders, and other serious diseases where protein growth factors play a fundamental role, today announced it will host an Investor Day on Wednesday, May 22, 2024 beginning at 8:30 a.m. ET in New York City.

The Investor Day will feature presentations by members of Scholar Rock's executive management team about the Company's myostatin inhibition programs in SMA and obesity, as well as commentary from key opinion leaders Dr. Ania Jastreboff, M.D., Ph.D., Associate Professor of Medicine (Endocrinology) Yale School of Medicine, and Diana Castro, M.D., Founder of the Neurology & Neuromuscular Care Center and Neurology Rare Disease Center.

A slide presentation and live audio webcast of the event may be accessed by visiting the Investors & Media section of the Scholar Rock website at http://investors.scholarrock.com. An archived replay of the webcast will be available on the Company's website for approximately 90 days.

About Scholar Rock

Scholar Rock is a biopharmaceutical company that discovers, develops, and delivers life-changing therapies for people with serious diseases that have high unmet need. As a global leader in the biology of the transforming growth factor beta (TGFβ) superfamily of cell proteins and named for the visual resemblance of a scholar rock to protein structures, the clinical-stage company is focused on advancing innovative treatments where protein growth factors are fundamental. Over the past decade, Scholar Rock has created a pipeline with the potential to advance the standard of care for neuromuscular disease, cardiometabolic disorders, cancer, and other conditions where growth factor-targeted drugs can play a transformational role.

Scholar Rock is the only company to show clinical proof-of-concept for a muscle-targeted treatment in spinal muscular atrophy (SMA). This commitment to unlocking fundamentally different therapeutic approaches is powered by broad application of a proprietary platform, which has developed novel monoclonal antibodies to modulate protein growth factors with extraordinary selectivity. By harnessing cutting-edge science in disease spaces that are historically under-addressed through traditional therapies, Scholar Rock works every day to create new possibilities for patients.
