Scholar Rock to Present at Upcoming Investor Conferences

February 18, 2026

CAMBRIDGE, Mass.--(BUSINESS WIRE)--Feb. 18, 2026-- Scholar Rock (NASDAQ: SRRK), a global biopharmaceutical company dedicated to dramatically improving the lives of children and adults with spinal muscular atrophy (SMA) and additional rare, severe, and debilitating neuromuscular diseases by applying its leading platform in myostatin biology to advance musculoskeletal health, today announced that management will participate in the following investor conferences:

- **TD Cowen 46th Annual Health Care Conference**: Scholar Rock is scheduled to participate in a fireside chat at 1:50 p.m. ET on Wednesday, March 4, 2026 in Boston, MA
- **Leerink Partners 2026 Global Healthcare Conference:** Scholar Rock is scheduled to participate in a fireside chat at 2:30 p.m. ET on Tuesday, March 10, 2026 in Miami, FL.
- **Barclays 28th Annual Global Healthcare Conference:** Scholar Rock is scheduled to participate in a fireside chat at 8:30 a.m. ET on Thursday, March 12, 2026 in Miami, FL.

A live webcast of the events will be available under the “Events and Presentations” page within the Investors section of the Scholar Rock website at http://investors.scholarrock.com. A replay of the webcasts will be available for approximately 90 days.

About Scholar Rock
Scholar Rock is a late-stage biopharmaceutical company focused on developing and commercializing apitegromab for children and adults with spinal muscular atrophy (SMA) and other rare, severe, and debilitating neuromuscular diseases. As a global leader in myostatin biology, a field focused on proteins that regulate muscle mass, the biopharmaceutical company is named for the visual resemblance of a scholar rock to protein structures. Our commitment to unlock fundamentally different treatment approaches is powered by broad application of a proprietary platform, which has developed novel monoclonal antibodies to modulate protein growth factors with extraordinary selectivity. Scholar Rock works every day to create new possibilities for patients through its highly innovative anti-myostatin program, including opportunities in additional rare neuromuscular diseases.
